Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 1, 2003 has been entered.

Claims 1-23 are pending.

Claims 15-23 are withdrawn from further consideration as they are directed to non-elected invention.

Objections

The amendment filed April 18, 2001 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "pulmonary fibrosis".

Applicant is required to cancel the new matter in the reply to this Office Action.

Examiner notes that although *ipsis verbis* is not required for fulfilling the written description requirements, there has to be some blaze marks disclosed in the specification that lead one of skilled in the art to the specific limitations. In the instant case, even though pulmonary fibrosis may be one of the disorders encompassed by the genus of diseases, there is no "blaze marks" provided that leads to the one of skilled in

the art that the applicant have possession of treating the underlying cause of "pulmonary fibrosis".

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The expression "underlying cause of ..." recited in claim 1 and 11 renders the claims indefinite as to what underlying causes the claims are encompassed. It is not clear what underlying cause the claims are intended to encompass. Examiner notes that the underlying cause of the disorders is not necessarily elevated IL-1 and TNF- α level since the said disorders or diseased is not necessarily caused or induced by elevated IL-1 and/or TNF- α level. Furthermore, it is not even clear what pathological conditions might be encompassed by the instant claims other than the specific disease states recited in claim 3.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1617

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 1,578,452 ('452) as evidenced by US 5,986,129 ('129).

'452 teaches a method of treating rheumatoid arthritis and osteoarthritis employing diacerhein (1,8-diacylrhein as taught in '129), in a dosage of 50mg (See page 4, lines 25-38). '452 also teaches diacerhein can be formulated into different dosage forms such as tablet, pill, or a capsule (See page 4, line 1).

The treatment of the underlying cause is considered inherently present in the method of treating rheumatoid arthritis disclosed in '452 since '452 teaches the exact same active method steps as recited. Accordingly, the inhibition of IL-1 and TNF- α levels is also considered inherently present in the method of treating rheumatoid arthritis disclosed in '452.
